# DIPLOMA IN PHARMACY – 2<sup>nd</sup> YEAR LESSON PLAN BIOCHEMISTRY & CLINICAL PATHOLOGY – THEORY

# Course Code: ER20-23T 75 Hours+25 Hours Tutorial (3 Hours/week + 1 Hour/ Week Tutorial)

Name of Tutor/Teacher: Sh. Dalbir Singh, Senior Lecturer in Pharmacy (Tutorial) Schedule of Classes: Theory: Monday: 12.00 – 01.00 PM, Monday: 02.00 – 03.00 PM,

Wednesday: 02.00 – 03.00 PM, Wednesday: 03.00 – 04.00 PM (Tutorial) **Scope:** This course is designed to impart basic knowledge on the study of structure and functions of biomolecules and the chemical processes associated with living cells in normal and abnormal states. The course also emphasizes on the clinical pathology of blood and urine.

**Course Objectives:** This course will discuss the following at the fundamental level

- 1. Structure and functions of biomolecules.
- 2. Catalytic activity, diagnostic and therapeutic importance of enzymes.
- 3. Metabolic pathways of biomolecules in health and illness (metabolic disorders).
- 4. Biochemical principles of organ function tests and their clinical significance.
- 5. Qualitative and quantitative determination of biomolecules/metabolites in the biological sample.
- 6. Clinical pathology of blood and urine.

**Course Outcomes:** Upon successful completion of this course, the students will beable to

**CO2.3T.1:** Describe the functions of biomolecules

**CO2.3T.2:** Discuss the various functions of enzymes in the human system

**CO2.3T.3:** Explain the metabolic pathways of biomolecules in both physiological and pathological conditions

**CO2.3T.4:** Describe the principles of organ function tests and their clinical significances

**CO2.3T.5:** Determine the biomolecules/metabolites in the given biological samples, both qualitatively and quantitatively

**CO2.3T.6:** Describe the clinical pathology of blood and urine

## **BIOCHEMISTRY & CLINICAL PATHOLOGY – PRACTICAL**

#### **Course Code: ER20-23P**

### 50 Hours (2 Hours/week/Batch)

Name of Tutor/Teacher: Sh. Dalbir Singh, Senior Lecturer in Pharmacy (Tutorial) Schedule of Classes: Practical: Monday: 09.00 – 11.00 AM, Wednesday: 09.00 – 11.00 AM, Tuesday: 09.00 – 11.00 AM

**Scope:** This course is designed to train the students in the qualitative testing of various biomolecules and testing of biological samples for determination of normal and abnormal constituents.

**Course Objectives:** This course will train and provide hands-on experiences on thefollowing

- 1. Qualitative determination of biomolecules/metabolites in simulated biological samples.
- 2. Determination of normal and abnormal constituents of simulated blood andurine samples.

**Course Outcomes:** Upon successful completion of this course, the students will be able to

- **CO2.3P.1:** Qualitatively determine the biomolecules/metabolites in the given biological samples.
- **CO2.3P.2:** Determine the normal and abnormal constituents in blood and urine samples and interpret the results of such testing.
- **CO2.3P.3:** Study the various Biochemical reactions.
